DETAILED ACTION

This is in response to amendment filed on 6/9/06 in which claims 1-25 are pending. The applicant's amendments have been fully considered therefore this case is in condition for allowance.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art of record fail to anticipate or render obvious the following recited features: an equalizer for providing first and second DFE outputs corresponding to a standard decision directed (dd) mode and a soft dd mode, respectively and a comparator for comparing byte error rates (ByER) of said first and second DFE outputs for selecting as a superior mode that mode associated with a lower ByER and outputting the DFE output with said lower ByER as recited in claim 1. Comparing byte error rate (ByER) in each of said first and second FEC output signals to ascertain which of said automatic switching mode and said soft automatic switching mode is a superior mode for ByER under given conditions; deriving a selection signal from said superior mode; and utilizing said selection signal for controlling said DFE as recited in claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
